PS41 - “BPG” Beam Pocket Gasket

Composite Foam Covered 20ga metal flat stock profile with FRG along one edge for sealing around I-Beam penetrations. Designed for attachment through FRG strip into “horseshoe framing” around Beams covering beam pocket mineral wool fill and square cut drywall around beam. Disconnect between wall and assembly and beam protection allows for unlimited vertical deflection and Level III dynamic cycling. Black Foam Finish is maintenance free and can be painted for aesthetics with improved STC and Security against access through beam pockets.

- Use with UL [HW-D-0895](#) & HW-D-1XXX Beam Penetration and Square Cut Drywall
