

Solid Continuous Angle Backer (SCAB) Solutions

- Required Backing of “Cut Out Track Flanges” – Cavity Obstructions
- Code Compliant Seal of “Static” Penetrations through Dynamic Joint Zones
- Friction Fit Install - Continuous Support of Smoke & Sound Joint Protection
 - Penetration Profiles Require use of FBC listed compatible sealant

SCAB

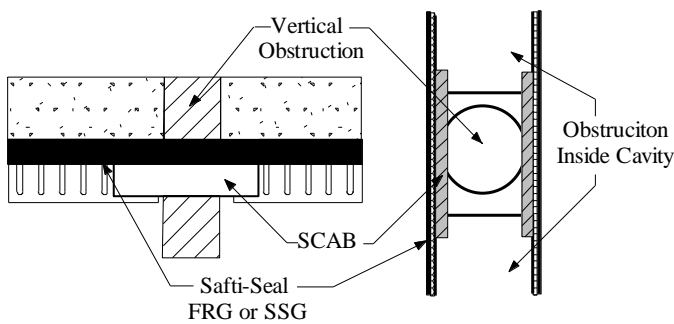

Continuous Backing of Smoke, and Sound Joint Protection

“Snip Slot” Flange to Accommodate Off-Center Obstructions

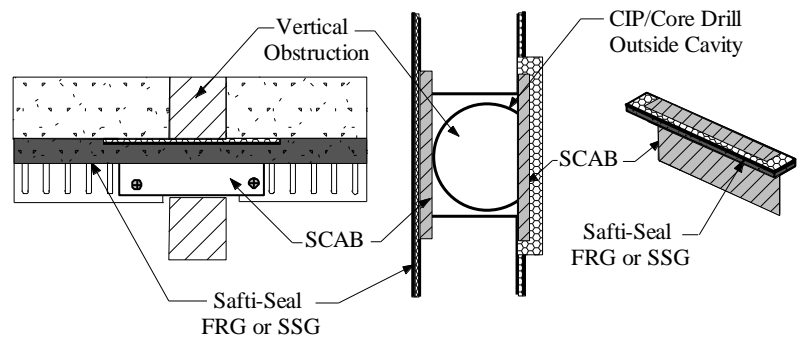

Reversible for Covering Core Drills Outside Cavity

Obstruction Inside Cavity

Obstruction Outside Cavity

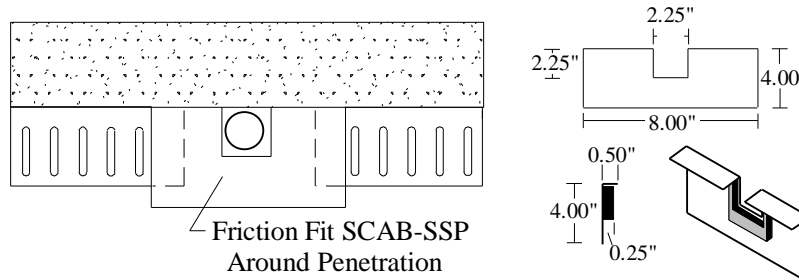

US Patents Pending

SCAB – SSP (Smoke & Sound Plastic)

Backing with Large Knockout & Sealant Support inside Cavity for CPVC & PVC penetrations
Complete before Stud & Drywall with Level III (seismic) 100% Movement Capability

SCAB – SSM (Metallic)

Backing with Sealant Support inside Cavity for Metallic penetrations
Complete before Stud & Drywall with Level III (seismic) 100% Movement Capability
